

## Jeco Energies – Electrical Designer

### **Electrical Designer**

At Jeco Energies, we build smart, future-oriented energy solutions for industrial customers every day. From low-voltage to high-voltage installations: our projects require technical depth, precision and cooperation. To strengthen our engineering team, we are looking for an Electrical Designer.

As an Electrical Designer, you will report to the Head of Engineering and work closely with Project Management and other engineers. You are an essential link in the design and technical development of our industrial energy projects. You are responsible for the design, development and management of electrical installations within the low, medium and high voltage segments. You support the engineering team and ensure that our designs are technically correct, safe and in accordance with the applicable standards.

#### **Your responsibilities:**

- Design and development of electrical diagrams for LV, MV and HV installations
- Reading, understanding and evaluating detailed electrical plans
- Drawing and optimizing electrical and mechanical schematics
- Manage and update schedules, index plans and plan lists
- Ensuring that all designs comply with standards, legislation and safety regulations

- Providing technical support to fellow engineers and project managers
- Answering technical questions from customers and suppliers
- Contributing to continuous improvement in the field of quality, safety and the environment (SHEQ)

## What do we expect from you?

### Technical competences:

- In-depth knowledge of electrical installations
- Strong in technical drawing and diagram interpretation
- Experience with drawing programs such as AutoCAD, Inventor, SEE Electrical and/or Eplan
- Knowledge of Caneco
- Smooth handling of software such as MS Office, ERP (Business Central/Navision), Prime Time and Phronesys
- Professional knowledge of Dutch and English

### Soft skills:

- Strong problem-solving skills and flexible in execution
- Team player who works smoothly in project environments
- Clear and professional communicator towards colleagues, customers and suppliers
- Customer-oriented and result-driven

- Strong in planning and organizing
- Good spatial awareness for complex technical schemes
- Able to present and explain technical information clearly

### **Safety, Quality & Environment (SHEQ)**

- Active support of the quality, safety and environmental management system
- Taking responsibility for complying with and following up on SHEQ measures
- Contributing to a culture of continuous improvement

### **Education & certificates:**

- Bachelor's or Master's degree in a technical field
- In possession of (or willing to obtain):
  - BA4
  - VCA basis
  - Driving license B

## **What do we offer you?**

- Working in a growing and innovative organization.
- Projects where you have a real impact on customers and on the industry.

- A close-knit team in which expertise, safety and quality are central.
- Training and career opportunities.
- Contract of indefinite duration
- Attractive gross salary with extra-legal benefits (MCs, car + charging card,...)
- 32 days of leave, free to choose

At Jeco Energies, we believe that **strong teams are born from diversity**. Combining different expertise, backgrounds and perspectives is an essential part of our growth, just as we do within our technical domains and R&D activities. Equal opportunities, regardless of gender, age, origin, conviction or disability. We strive for a culture where every employee feels **safe, respected and valued**.

Diverse teams make us smarter. And smart energy, that's what Jeco Energies stands for. **#whenpowerbecomesmart**

- **Acquisition in response to this vacancy is not appreciated.**
