

Jeco Energies – Electrical Site Supervisor

Electrical Site Supervisor

Are you an experienced industrial electrical site supervisor with a passion for industrial automation? Do you have 5 to 10 years of experience in an industrial setting and are you looking for a position that includes a company car, competitive pay, and opportunities for advancement?

Let's talk about the possibilities and opportunities at Jeco Energies.

As an Industrial Electrical Site supervisor, you will coordinate, supervise, and perform electrical work within industrial and manufacturing environments.

You will actively participate on-site, manage a small team of technicians, and ensure that projects are completed safely, to a high standard, and on schedule.

You will report to the project managers and the Team Lead Field Technicians. Duties and Responsibilities
Company vehicle (also for personal use)

Your responsibilities

- Coordinating and supervising electrical work at industrial sites
- Managing and coaching technicians (people management)
- Actively participating in industrial electrical installations
- Reading and interpreting electrical diagrams and design plans
- Connecting control and power panels
- Installing, maintaining, and commissioning low-voltage (LV) systems
- Connecting and terminating cables and plugs
- Preparing and monitoring sites, participating in site meetings
- Serving as a point of contact for customers, technicians, and project management
- Ensuring safety, quality, timing, and efficiency

Safety, Quality, and Environment (SHEQ)

- Implementing and supporting safety and quality policies
- Identifying and reporting risks and incidents
- Ensuring compliance with safety regulations (VCA)
- Coaching colleagues on safe and high-quality work practices
- Active contribution to continuous improvement

Profile – Industrial Electrical Site Manager

- 5–10 years of experience in industrial electricity, automation, or electrical engineering

- Bachelor's or Associate's degree in Electrical Engineering, or equivalent through experience
- Experience with site supervision and site coordination
- Strong technical knowledge of industrial electrical installations
- Leadership, sense of responsibility, and a coaching mindset
- Hands-on and problem-solving
- Customer-focused and strong communication skills
- Language skills: Dutch and English

Certifications (or willing to obtain)

- BA5
- VCA VOL
- MEWP (Mobile Elevating Work Platform)
- Driving license B
- Company car (including private use)
- Competitive salary based on experience
- Meal vouchers
- Clear growth plan and career advancement opportunities
- Training and technical upskilling
- Fun team-building activities and a collaborative work environment
- Work on challenging projects within Industrial Automation
