

Jeco Energies – Technician

At **Jeco Energies**, we are seeking an enthusiastic technician to strengthen our operations team. Whether you're young and full of energy or an experienced professional, you will find the perfect place with us to apply and further develop your talents.

As a technician, you will contribute to impressive low-voltage and automation projects. Think of large-scale operations such as port installations, production facilities, or logistics centers. Your passion for working in an electrotechnical environment will thrive here. You will take pride in working with your team to build and improve electrical installations.

As a technician, you'll work in a team of 2 or more great colleagues. Together, you will be responsible for setting up low-voltage and automation projects, including:

- Reading and applying electrical diagrams
- Installing electrical components
- Pulling and connecting power and control cables
- Installing and connecting electrical distribution or control panels
- Installing and connecting electrical field components

What do we expect from you?

- Have you completed a technical education in an electrical field? Or gained equivalent knowledge through experience? Perfect!
- Do you already have experience as a technician? Great!
- Just finished school? No problem!
- You enjoy working in a team but can also work independently when needed.
- You easily adapt to different situations.
- Working on-site doesn't faze you.
- Do you have a drivers license (B)? Fantastic, it helps you move around easily.

What do we offer?

- **Permanent contract:** A long-term contract with an attractive and competitive salary, complemented with numerous extra-legal benefits such as hospitalization insurance, meal vouchers, and much more.
- You'll work **regular day shifts**, no long days or late evenings.
- **Vacation days:** Enjoy 20 statutory vacation days plus 12 additional ADV days for that well-deserved extra time off.
- **Dynamic work environment:** Become part of a vibrant and dynamic environment with a pleasant atmosphere where you'll feel at home right away.
- **Training opportunities:** Benefit from extensive training possibilities to continuously sharpen and grow both

your technical skills and personal competencies.
