

Jeco Energies – Technician Industrial Electricity & Automation

At **Jeco Energies**, we work every day on smart, safe, and future-proof energy and automation solutions. Within our projects, we combine technical depth with a pragmatic approach, from design through to on-site execution.

For our operational teams, we are looking for a **technician with a strong background in industrial electricity and automation**, who is ready to take responsibility in the execution of our projects.

As a technician, you are involved in the realization of industrial electrical installations in low-voltage systems and automation. You will work on various sites across diverse industrial environments and, together with your colleagues, ensure high-quality and efficient project execution.

You will be working in an environment where **quality and technical expertise are central**. You will be exposed to:

- Industrial low-voltage installations
- Control and power cabling
- Distribution boards and control panels
- Field components within automation environments
- Project-based execution in production, logistics, and infrastructure environments

What do we expect from you?

Your responsibilities:

- Reading, analyzing, and correctly applying electrical diagrams and plans
- Installing and connecting power supply and control cabling
- Installing and wiring distribution boards and control panels
- Connecting and testing industrial components (motors, sensors, actuators, etc.)
- Performing preparatory and supporting mechanical tasks
- Identifying technical deviations and contributing to solutions on-site
- Actively contributing to safety, quality, and project progress

Knowledge & Experience:

- Solid technical knowledge of industrial electrical installations and/or automation
- Experience in an industrial project environment
- Ability to work independently and take responsibility on-site
- Accurate and structured way of working

- Strong focus on safety, quality, and finishing
- Hands-on mentality and solution-oriented mindset
- Good collaboration with fellow technicians and site management
- Driver's license B

What you can expect:

You will have the opportunity to take ownership of your role, show initiative, and contribute to high-quality industrial solutions.

- A permanent position within a stable and growing organization
- Competitive salary aligned with your experience
- Meal vouchers and additional benefits
- 32 days of leave of your choice (20 statutory days and 12 additional leave days)
- Technically challenging projects within industrial environments
- Opportunities to further develop your expertise

When power becomes smart, our technicians make the difference on-site.

At Jeco Energies, we believe strong teams are built through diversity. Bringing together different expertise, backgrounds, and perspectives is an essential part of our growth—just as it is within our technical domains and R&D activities.

We offer **equal opportunities regardless of gender, age, origin, belief, or disability**, and strive for a culture where every employee feels safe, respected, and valued.

Diverse teams make us smarter. And smart energy is what Jeco Energies stands for.
